The persistent myth and **half-truth, which is a whole lie**, continually circulates about Veterans Affairs medical care in toto being better than or on par with the private sector. That veterans get 'free' health care and other unearned entitlement at taxpayer expense in contrast to what the general public receives, which many civilians envy as unearned privilege. 'The whole lie' about these misnomers is untruth by omission of pertinent facts, which is '***misperception propaganda'*** to rhetorically make VA appear much better that what it is in reality.

First Fact: **The Big Lie**. Adolf Hitler once quipped, " [*When telling a public lie, tell the biggest lie possible, mixed with a grain of truth so that masses will believe it...*]" Ol' Adolf should know for all the 'porkys' he and his Nazi's got away with telling during WW2. Those folks wrote the book "*Effective Mass Lying 101*." **VA PR refined that to a fault.** One pervasive half-truth is that veterans get 'free' healthcare and benefits on par or better than private sector, which is now a commonly believed, persistent, propagandized, *whole lie*. ***Here are historical facts – you figure out the rest.*** During the Clinton Administration, first lady, Hillary Clinton's plan was to sell America on Socialized Healthcare. She needed a sterling Socialized example so chose the VA as her model. Armed with a presidential decree she gave VA an ultimatum: *reform into that sterling model* ***or else***. ***Hillary Clinton needs no introduction: she has sharp teeth and a very nasty bite. However, one has to give that woman credit! She got things done in Washington DC! One woman accomplished what all our representatives in 'The Ship of Fools' US Congress could and still cannot: meaningful VA reforms.*** In 1994, Clinton put Kenneth Kizer in charge of the VA health system, as Undersecretary of Veterans Affairs. The new sheriff over that agency had large teeth and a nasty bite, too. Kizer among his many accomplishments, reformed VA; he modernized the VA's computer systems, fired poor-performing doctors, support staff, and established private-sector-style metrics to measure the VA's performance on things like patient wait times, care quality, service, etc. In other words, during his five-year tenure, ***armed with Oval Office authority***, ***not more and more budget money***, ***Hillary and Kizer*** reformed VA into a top-performing healthcare and benefits institution, which became a jealously envied crown jewel by the US private sector medical industry. Wrested from entrenched, status quo 'good old boy and girl' interests, dead set against them derailing their gravy trains, ***Hillary and Kizer created a long overdue mammoth train wreck from them to provide quality Veteran healthcare and the benefits they earned and deserved for the very first time in VA history.*** However, all good things must end; after Clinton left office and Kizer resigned from VA so did their success story. Recidivism quickly reclaimed the institution to its former free lunch and ride on VA gravy trains for status quo 'good old boy and girl' special interests: VSO's, political pork, crony's, internal corruption, etc. All the while, stealing credit for Clinton and Kizer created successes during the 1994-1999 'VA golden age.' ***In other words, VA propagandized Clinton's and Kizer's accomplishments from over 22 years ago plagiarizing credit for what it did not do.*** *VA is now considered the worst healthcare system in America; while perpetuating commonly believed, lies to the contrary that even ol' Adolf Hitler and his Nazis would envy.* Ref in part to Avik Roy, Forbes Staff writer.

Second Fact: the only good healthcare I received from VA was not from its medical staff. VA cannot hire and/or keep good, competent staff doctors, therapists or nurses. If these people had anything going for them, none would be working at VA. According to civilian medical nurses and doctors that I spoke to about their experiences working there, "listing VA as previous employer on a resume is career suicide except, maybe, when working at an '*ambulance chasing, clap clinic*,' said one vociferous, experienced nurse who was nobody's fool. She worked at five VA hospitals as a job shopper and had very negative experiences to share about them all. On her resume, she listed the contract company that hired her NOT the VA to get around career sinking stigma associated to the agency. The other five doctors and nurses all said the same as she when considering their experiences working at VA either as temps or residents during medical school.

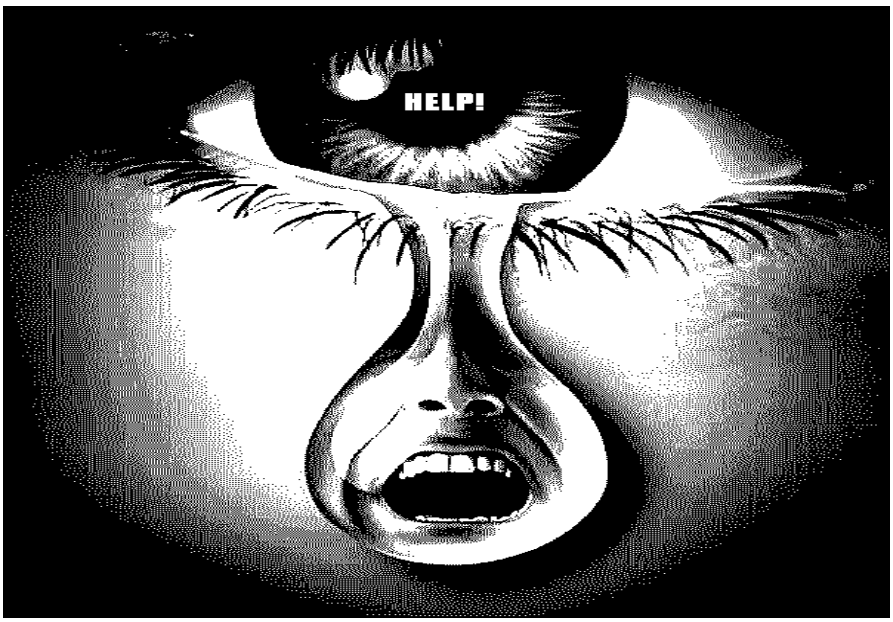
Why I used VA is very complicated. Over forty years ago after discharge from military, I attempted to use it for benefits that "I earned and deserved" and the whole mess was a sham from the get-go. Like over 90% of all US vets ***that do not use VA at all***, I abandoned it for civilian sector healthcare and other benefits. VA's skewed numbers cite that at over 87% of all veterans do not use it at all. The corporation actually only directly cares for less than 10% of the total US veteran population cosuming an annual budget of nearly 400-billion dollars annually ***and cannot get that right!*** Out of a 400-billion dollar annual budget, only fifty-cents of every five dollars goes to veteran care. Who and what is getting the rest of it?! Then life or death circumstances beyond my control forced me into that nightmare, which is an understatement, from 2017 – 2020. To condense my experiences of VA-hell-care, the only good medical treatment received during those three years was from contract nurses, doctors, and residents briefly employed to treat veterans. VA claims to be avant-garde in many areas of care. What it does not tell you is that outside medical resources are doing that 'care' not its incompetent medical staff, which is nothing more than desk clerks with, maybe, an MD or nursing license. Getting care from one of them is like going to the USPS or DMV for it. They are almost immune from malpractice indemnity so do not suffer consequences for harming, crippling and killing patients. One of the selling points used to attract these people to VA is that employed nurses and doctors do not need to purchase

expensive malpractice and other liability insurance, and the bureau is not at all fussy about qualifications. Can you spell doctor and nurse? Bingo, you are hired!! Consequently, qualified medical staff shortage is so acute; VA uses incompetent nurses in place of doctors with fancy titles like NP, APN and PA – nurse practitioner, "A" practicing nurse and physician assistants. In one of the worst personal instances, I underwent over 7 months of primary care NP mistreatment - i.e., she could not read lab results well enough to describe them to a patient. I was suffering from severe hypertension and related kidney failure and her Rx was call 911 if you have signs of stroke or heart attack, and then sent me home without treatment. While seeing her, I again qualified to buy affordable medical insurance coverage and VA charged it for those services. By law if a vet has it, s/he must provide policy information to the agency for billing. Cost for each office visit and lab work - over $600.00 charged to my private health insurance. That is the dirty top secret behind three hundred thousand vet deaths during Obama's Administration for those kept on secret waiting lists because priority went to paying customers for scarce resources. Is that not rationing? The untreated charity cases that government paid for anyway was money for nothing - four hundred billion-tax dollars annually. Whereas insured customers get priority. Is that not rationing? Her mistreatments forced my return to private sector care; where the cost for an office visit to see a real doctor, treatment and labs was $221.00 charged to my medical insurance plus small co-payments. If I enrolled in a private HMO, such as Humana, co pays are zero for much better care provided by real, competent doctors! In other words, ***Socialist, government provided substandard medical care costs are almost four times that of the civilian sector.*** That should give pause to anyone about pushing for single payer, government provided, Socialized medical care in America!! People will get far less if anything while paying far more than ever before. Two women veterans who now get all their care under State Medicaid said, " My care by Medicaid doctors is much easier and better to receive and free to me including drugs because my income allows that benefit. The women's VA was awful, incompetent and I had to co pay for meds. *I had to find something better*..." Now people will cite horror stories about private healthcare. Obviously, they are not acquainted with them at VA. For instance and most damning of all is that I have yet to know of a single patient suicide on private clinic or hospital premises protesting bad healthcare! Whereas 24 veterans died by suicide during an 18-month span between 2017-2019 ***on VA campuses***, many self-immolated on premises and off, adjacent to VA property. One did so on a hospital front steps. Self-immolations same as protestors who died on Red and Tiananmen Squares in Russia and China, respectively, in bringing awareness to human abuses in those communist countries. Russia's and China's abuses were nationally broadcast ***in our faces*** by American mass media. Yet, hidden to the public was veteran self-immolation, suicide on US government properties... Bureau staff 'therapists' using psychotic medications and psychiatric abuse during 'therapy' terrorized vets into suicidal psychosis then set the freaked out person loose to finish their *murder by therapy*. Murder is murder regardless of methods used to do it. *Moreover, VA employees consider any vet that threatens suicide or comes in for suicidal ideation treatment as harassing them!* ***Yes, that is right, harassing VA employees***, so *they* intimidate, minimize, and worry a vet out the door instead of helping s/he. Evidence a VA doctor that screamed, "Let him commit suicide I do not care" at a suicidal vet seeking emergency, mental healthcare. *Two days later that is exactly what happened; the vet killed himself.* The corporation gave that doctor a bonus. However, after press releases incited public outcry and bad opinion upon Washington DC lootership, VA discharged the doctor almost a year later for his crime of murder by proxy. ***Aforewritten is the reason for ongoing, growing, US veteran suicide epidemic***: *VA is causing it*! Perhaps ***not all*** of it; ***but most all of it***! One hundred vets per day die by suicide from lack of care from VA and America. Private sector abuses pale in contrast to those atrocities alone!! If VA, which is a pure Socialist medical and benefits system, had to compete - without legal immunity for its failures and taxpayer financial support - in the private sector **it would totally fail in one month** – then spend years fighting malpractice suits and criminal negligence charges – reference aforementioned and Clarksburg West Va mass murders by VA hospital medical staff. That agency is rightly considered the worst healthcare and benefits system in the entire country. Unless a vet is 100% disabled, nothing there is free at all. Co-payments for poor quality drugs and services are often higher than in civilian sector. When adding in sacrifices fulfilling military duty, associated injuries, plus total taxes paid to US treasury plus a vet's medical insurance premiums our medical costs are far more than anyone in civilian sector pays!! I can go on at length about that house of horrors in its inhuman experiments on veteran human animals, plus now on dogs and cats while claiming to be an *award winning* healthcare system. Perhaps the Dr. Mengele, aka Dr. Death Award? If veteran welfare were core concern to Americans, Veterans Affairs Dept would not exist. We would all be in the private sector getting genuine help same as civilians not as prisoners in the worst HCS from in the nation that we served. Just remember, ***when VA claims to do all these "wonderful" things for us, all of that "breathtaking" care comes from civilian healthcare resources purchased by the US government with tax dollars!*** Otherwise, their claims are blatant, bald-faced, PR spun - lies. Moreover, nearly all actual veteran care taking comes from outside the bureau from family, spouses, friends, 'good Samaritan' strangers, Social Security and other ***private*** disability systems, State resources, public and private HCS, insurance companies and at the very least

thousands of veteran charities operating on shoestring budgets – **NOT VA** operating on hundreds of billions of taxpayer and private healthcare dollars annually**!** ***I cannot understand why the private healthcare industry is not screaming to the moon that a government run Socialist HMO also can competitively bill private insurance in addition to tax subsidies that every private medial employee and institution pays in taxes!!*** Then it simply plagiarizes credit for what VA does not and never did do as cover up. Think about those facts; I can prove them all; although with a little effort you can find them publicly posted everywhere. Google - 'VA abuses, scandals and 'VA sucks' sites' while they exist, censorship removes them in paving the way for selling Socialized medical care to USA. However, web pages never go away. Sites of archived web pages still have the censored information available but one has to dig for it. However, the best source is talk to veterans undergoing or who have undergone VA experiences. Nothing is better than personal experiences, though – nothing! Mass media would have you fear and avoid us so that nobody can learn the truth. But for uncle Tim and Tom, propaganda spewing shills and toadies, vets will give it to you brutally, ugly and - straight. Barring that, research "veteran suicide epidemic," homelessness, legal troubles ad infinitum – then ask why so much misery. All of it is out there for truth seekers. Honest facts exist everywhere. Truth cannot be hidden or censored and knowledge of it will set you free... 100 veteran suicides per day cannot be wrong. *An inconvenient truth that you own, in toto,* ***America*****.** If you buy into Socialized healthcare not only do you own it, the truth will curse your life and that of your loved ones forevermore.

VA SUICIDE PREVENTION AND TREATMENT PROGRAMS.

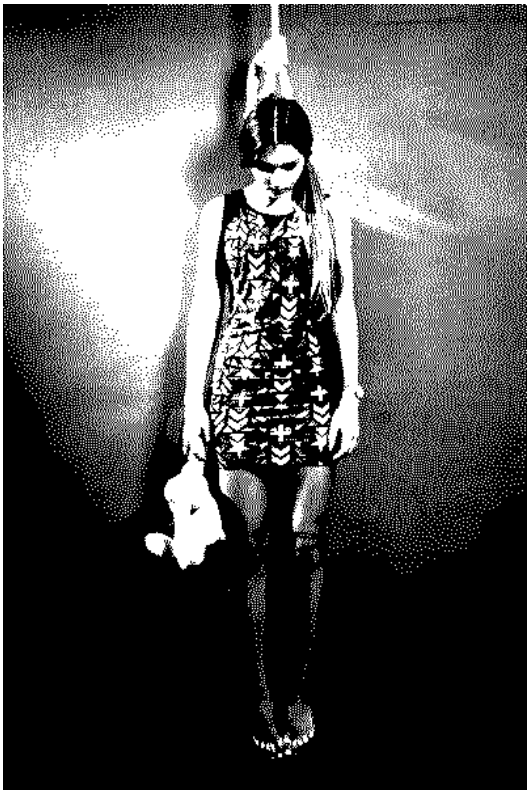
WHEN REQUESTING



VA PRESCRIBED A NOOSE

VA's SUICIDE PROBLEM MIGHT BE RESOLVED

BUT NOT FOR HER



V A and America refused her help.
So, this Veteran died alone with only a teddy bear as comfort.

Only America and VA can stoop this low profiteering from veteran suffering and suicides.

100 PER DAY Military and Veteran SUICIDES
is no joke.

The Girl Child

The Girl Child" ~ Nazim Hitmet

"I come and stand at every door
But none can hear my silent tread
I knock and yet remain unseen
For I am dead, for I am dead

I'm only seven though I died
In Hiroshima long ago
[My sister died in Nagasaki]
I'm seven now as I was then
When children die they do not grow

My hair was scorched by swirling flame
My eyes grew dim my eyes grew blind
Death came and turned my bones to dust
And that was scattered by the wind

I need no fruit I need no rice
I need no sweets nor even bread
I ask for nothing for myself
For I am dead, for I am dead

All that I need is that for peace

You fight today, you fight today
So that the children of this world
Can live and grow and laugh and play?
For I am dead, for I am dead –

Hell is for children.

Americans live in a fantasy about WAR! Their myopic, narrow minded, romantic, archaic idealisms date to before the 19th century! The US created and exported atomic war into the world; testing the doomsday creation in Japan, as an act of war, on non-military, civilian cities in an attack planned and executed before Japanese diplomats could reach the peace tables. America experimentally used those doomsday weapons or WMD's on unarmed civilians, killing, crippling innocent men, women, babies and their descendants for decades to come. Human animal experiments of its new toy. Is that something to be proud of America? This nation called the bomber crew's heroes and Einstein - father of nuclear weapons - a 'God.' It called Vietnam soldiers baby and mother killers and worse disgraces to avoid facing national shame; but they were only messengers sent by ***The American People*** to again do its dirty work and Vietnam vets pale in onus compared to all the war crimes committed before and since by the American nation. ***We the Sheeple*** and its ***brave coward Socialist government*** remain the true baby and mother murders. Hiding our onus and guilt by scapegoating a minority that we created, and supported in toto, tasked to again commit proxy bloodshed for '***We the People.'*** Whether by substitute or directly, that bloodshed stains the hands of every patriotic person of the US nation - we own it all in toto. If the Homo Sapiens race does not evolve from current anal-retentive, evolutionary stage of **W**e-**A**re-**R**ight and promptly, it will again self-extinct the taxon back to 1 million BC for another try at re-evolving killing all of its born and unborn children in doing so. The US 'Native American' and Nazi Germany 'Jewish' Holocausts and final solutions reset the clock on humanity 50,000 years into the past! ***Aforewritten atrocities clearly evidence what the human animal is capable of doing to its kind; Hiroshima and Nagasaki atomic bombing of civilian cities – innocent men, women and babies, clearly show us what is at stake for humanity: self-extinction in toto***. Human animal experiments... ***Next time you look at your children or any child - just think that they could be next among "war casualties" killed in the name of "freedom."*** Cold-blooded murder is murder regardless of how or who does it. ***Hell is for children worst of all...***
